WET/WET DIFFERENTIAL PRESSURE TRANSMITTER

0.5% Accuracy, NEMA 4X (IP66) Enclosure

The SERIES 629C Wet/Wet Differential Pressure Transmitter monitors differential pressure of air and compatible gases and liquids with 0.5% accuracy. The design employs dual pressure sensors converting pressure changes into a standard 4 to 20 mA output signal or field selectable voltage. Small internal volume and minimal moving parts result in exceptional response and reliability. The terminal block, as well as a zero adjustment button, are easily accessed under the top cover. The Series 629C Differential Pressure Transmitter is designed to meet NEMA 4X (IP66) construction.

FEATURES/BENEFITS

- Powered by either DC or AC take advantage of most readily available power source reducing installation costs
- Optional LCD does not need a separate power supply lowers installed cost
 Selectable voltage range provides flexible choice for changing design or inputs for process/HVAC controllers being used to monitor and control
 Push button zero (versus trim pot) more simple zeroing provides easy install and
- calibration reducing installation time and possibility of operator error
 Optional LCD indicator provides local status to identify operational condition
