

OpenAir™

Fast running actuators for air dampers

GAP19...

Fast runner rotary version, AC/DC 24 V

Electronic actuator for 2-position, 3-position, or modulating control, nominal torque 6 Nm, at 2 s running time, self-centering shaft adapter, range mechanically adjustable between 0...90°, prewired with 0.9 m long standard connection cables. GAP196.1E with adjustable auxiliary switches for auxiliary functions.

Use

- For damper areas up to ca. 1 m², friction dependent.
- For laboratory fume hoods, etc.
- Suitable for use with continuous, 2-position, or 3-position controllers.

Type summary

Types	Power	Auxiliary switch	Torque	Damper size	Runtime
GAP191.1E	AC/DC 24 V	No	6 Nm	Ca. 1 m ²	2 s
GAP196.1E		Yes			

Note

When installing and operating rotary actuators type GxP191.1E and GxP196.1E in low-noise environments, check the acoustic response of the actuators operated together with the measuring and control equipment.

The combination with differential pressure sensors, sensors, and controllers may result in unwanted operational noise based on the operating settings, regardless of the given manufacturer.

Impacted applications

- Low-noise HVAC plants in general ¹⁾
- Supply and extract air plants
- Fume hood control plants
- Room pressure control plants

¹⁾ e.g. Laboratories / fume hoods, hospital rooms or similar plants

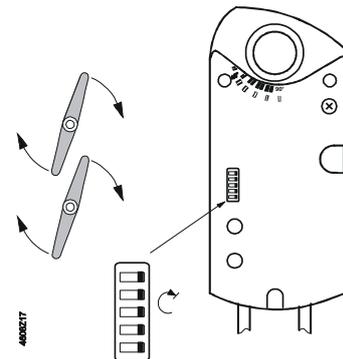

Alternative

We recommend using rotary actuator HLV40.1 if the applications listed above are motorized or in the event of any general concerns regarding operational noise of GAP actuators (Contact your local Siemens representative).

Factory setting

The actuator is preset at the factory to:

- 0...10 V
- Clockwise rotary movement.

Functions

DIL switch setting		A DIL switch is used to set the actuator's functionality.					
Siemens default setting	Continuous control				2-position control	3-position control	

Position indication: Mechanical	Rotary angle position.
Position indication: Electric.	Output voltage $U = DC\ 0..10\ V$ is generated proportional to rotary angle. U depends on the DIL switch's rotary direction position.
Rotary angle limitation	The rotary angle of the shaft adapter can be limited mechanically to 5° increments.
GAP196.1E auxiliary switch	The switching points for auxiliary switches A and B can be set mutually independent in 5° increments from 0 to 90° .

Ordering

Delivery	Individual parts such as shaft adapter with position indication and other mounting materials for the actuator are delivered unassembled .
Accessories, spare parts	Various accessories are available to extend the actuators' functionality; e.g. rotary/linear mounting kit, external auxiliary switch (1 or 2 switches) and weather shield; see data sheet N4697 .

Disposal

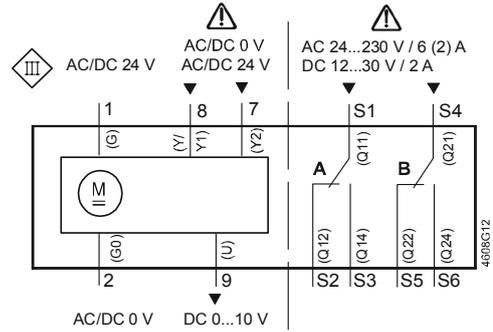

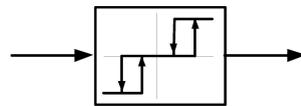

The device is considered an electronics device for disposal in terms of European Directive 2012/19/EU and may not be disposed of as domestic garbage.

- Dispose of the device through channels provided for this purpose.
- Comply with all local and currently applicable laws and regulations.
